

ERRATUM to the article by J. Nitychoruk, published in *Acta Geologica Polonica* vol. 50, no 2 (for 2000), pp. 247-294.

Due to technical reasons fig. 20 in J. Nitychoruk article was erroneously printed. The corrected version of this figure is printed below. We apologize the Author and our Readers for any inconveniences.

The Editors

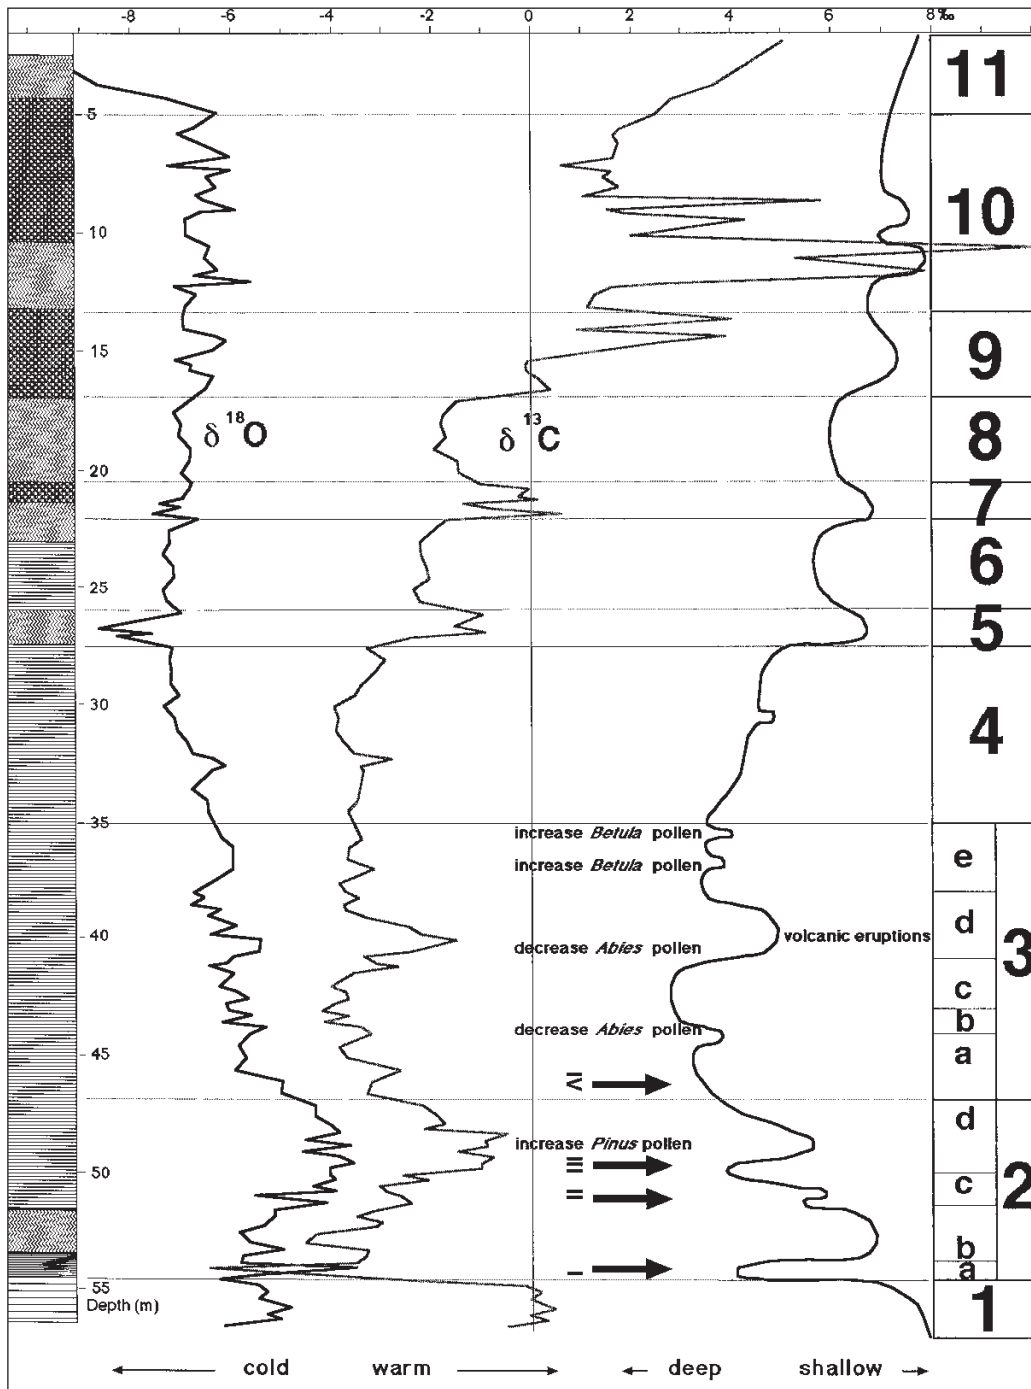

Fig. 20. Isotope horizons (1,2,...) and sub-horizons (a,b,...) of the Mazovian Interglacial and the initial part of the Middle Polish Glaciation, versus probable changes of water level in the palaeolake and isotopes for calcareous sediments in the Ossówka OS 1/96 borehole; arrows indicate increased marine influence; for lithological explanations see Text-fig. 8
